## Company Profile

Silver Pumps & Motors has established itself as a distinguished manufacturer of premium quality, efficient, reliable and durable pumps and motors for over 40 years. The company has diversified into various market segments and agriculture equipment is one of them.

## Company Expectations

The company decided to start an agricultural equipment range with the aim of achieving productivity, quality finish with quick color change without contamination. They also were seeking a solution that would deliver good coverage and coating results while minimizing powder consumption.

## Keys to Success

The customer is already a Gema customer using 2 automatic lines for ceiling fans. Gema has given them a high degree of flexibility in planning and operation with the latest system, which covers a very wide range of parts with great variance.
